

Please support the  
Glen of Imaal Terrier DNA Archive

The International Glen DNA Archive provides a facility to store Glen DNA, along with supporting pedigree and health information, for use in future health research projects.

All you need to do to support this important health initiative, is send off five buccal (cheek) swabs from your Glen, plus a copy of your Glen's pedigree and the submission form, to the Animal Health Trust (AHT).

To request a swab kit (one kit per Glen), please email the Animal Health Trust:

[canine.genetics@aht.org.uk](mailto:canine.genetics@aht.org.uk)

- Subject:** Swab kit request
- Name** Please provide your title and first & last names
- Address** Please provide your full postal address including post / zip code & country
- Number of kits** Please indicate the number of swab kits you require (one kit per Glen)

Contributions to the DNA Archive are welcome from non-UK resident Glens, as well as those living in the UK ... from Glens of all ages and health status.

For more information, please visit the dedicated Glen Archive website:
